Seating

As our work becomes more mobile, so the places where we work and socialize become more diverse.

The office / the hotel / the airport lounge / the co-working space / the university campus / the train station increasingly merge and at times it's difficult to tell them apart.

**Cubb Seating** is a concise range of contemporary chairs and stools designed to work within these dynamic environments and has an expansive range of typologies **designed to meet the diverse specification requirements demanded of these new work and leisure settings.**

# cubb

## Tables

Personal desks are increasingly being superseded by ‘light touch’ communal furniture offering greater flexibility and a smaller overall footprint. With collaborative team tables playing a key role in today’s Smartworking® environments, the expansion of the popular Cubb range of chairs and tables into this area was a natural progression.

The laid-back, informal attitude that originally made **Cubb Tables** so popular translates perfectly into team tabling at both work and café height. These tables are easy to customize, offering a choice of timber stains, metal finishes and work surfaces.

Each height of table offers a different way to work and interact with others in the collaborative workspace, and can be configured for four, six or twelve people. This brings a refreshing vitality and flexibility to team environments.

Round Tables	Project Tables
ø 47"	35" x 63"
ø 55"	35" x 83"
ø 63"	35" x 102"
ø 71"	

Small Rectangular Tables	Large Rectangular Tables
35" x 35"	47" x 118"
30" x 55"	47" x 177"
30" x 63"	55" x 118"
39" x 83"	55" x 177"
39" x 94"	

Occasional Tables
ø 24"
ø 31"
24" x 47"
24" x 24"
39" x 94"

21 different shapes and sizes.

## Work & Project Height

“ People are gravitating towards places with a hand-made comfortable feel. SPACES CREATED BY INDIVIDUALS, NOT COMMITTEES. The controlled, corporate atmosphere of the past no longer prevails in today’s more relaxed and welcoming environments. ”

### POWER LEG CHANNEL

Power and lighting cables can be run seamlessly up the legs of both Project and Work height tables, making them hidden from sight. The cables are then connected beneath the work surface.
